Profile:

I first experimented with game development in late 2020 using Unity and following YouTube tutorials, despite not making a lot of progress, my desire to make games remained and this is why I decided to take my skills to the next level by attending university.

Skills:

- Languages: I am proficient with C++ and C#, and I have some basic knowledge of x86 Assembly.
- Engines: I have used Unity extensively to create a few small games, and to some extent with Unreal and its Blueprints system.
- SDKs: I used SFML in my first year of university to create a few small projects, most notably a Breakout clone, I am currently using DirectX 11 as part of my course.
- Tools: I am proficient with Visual Studio, JetBrains Rider and Git.
- Mathematics: I can effectively use vectors, matrices and trigonometry, amongst other areas.

Education:

Sept 2023 – May 2027 (Expected Graduation)
BSc (Hons) Computer Science for Games - Sheffield Hallam University

This course places an emphasis on C++ programming for game development – including rendering and optimisation.

First Year: 79%

- Fundamentals of C++ Programming 87%
- Mathematics for Graphics 74%
- Programming 2D Games 65%
- Fundamentals of Computer Architecture 89%

Sept 2021 – May 2023
Level 3 Extended Diploma in Games, Animation & VFX Skills
The Sheffield College

Sept 2016 – June 2021
9 GCSEs, including 7 in Maths
The Birley Academy
